

PSYCHOLOGY OF LANGUAGE (830:351:01/615:371) Fall 2015
 (Syllabus will be updated during the semester – Please check periodically)
 Last Updated: October 26, 2015

WARNING: IF YOU CANNOT ATTEND CLASS REGULARLY, DO NOT TAKE THIS COURSE!

This is a hard class, and the exams stress the material that I present in class, some of which is not in the books.

INSTRUCTOR: Prof. Karin Stromswold
E-mail: psychlang@gmail.com
Office hours: Mondays 12 -1 pm
 Busch Psych Building, Room 233
Skype office hours: by arrangement

TEACHING ASSISTANT: Emily Roman
E-mail: TA.psychlang@gmail.com
Office hours: Tuesdays 2-3 pm
 Location: Busch Psych, room 319

Course: Mondays & Thursdays 10:20 -11:40 am, Pharmacology Building Room 115
Sakai site: PSY OF LANGUAGE F15

Learning objective: Psychology of Language explores the cognitive and neural bases of human language. The underlying question that this course seeks to address is: *What makes human language special?* How does human language differ from other systems of communication systems? What is the relationship between language and thought? Why are people able to speak, understand, and learn the sounds, words, and sentences of language with ease, despite the daunting computational problems associated with doing so?

READINGS (Do the readings in the order indicated in the Lecture Schedule)

REQUIRED TEXTBOOK: Traxler, M. 2011. *Introduction to Psycholinguistics: Understanding Language Science*, 1st edition. Wiley-Blackwell. (A copy will be on reserve at LSM)

- Print: ISBN-10 1405198621, ISBN-13 9781405198622.
 - In late August 2015, the official Amazon price is \$113, but there were new and used copies available through Amazon affiliates from \$20 (+ \$4 shipping).
 - Hard copy rental is about \$13 through Amazon.
- eText: ISBN-10 1118296885, ISBN-13 9781118296882
 - Kindle version: available for about \$80.
 - Course-smart rental (iPad, Mac or PC): 360 day rental for \$75

Recommended book [Some Pinker chapters are required. A copy of the book will be on reserve at LSM.]

Pinker, S. 2000/1994. *The Language Instinct: How the Mind Creates Language*. Harper Perennial Modern Classics. Any edition is fine (A copy will be on reserve at LSM)

- Print: ISBN-10: 0060958332; ISBN-13: 978-0060958336. Available new through Amazon for \$5-\$10. Lots of used copies around.
- eText: ASIN: B0049B1VOU. Kindle: \$11
- Audio (MP3, CD, Audible Audio): ISBN-10: 1455839701; ISBN-13: 978-1455839704: \$15-\$17

Required articles & chapters (available in "READINGS" resource on sakai site)

Bergman, A., Hall K.C., Ross, S.M., 2007. Speech perception language file (9.4). *Language Files: Materials for an Introduction to Language and Linguistics, 10th edition*. Ohio State University Press. Columbus, Ohio.

Crystal, D. 1991. Language & other communication systems, pp. 396-398. In *The Encyclopedia of Language*.

Fernandez, EM. & Cairns, HS, 2010. *Fundamental of psycholinguistics*, John Wiley & Sons, pp 25-44

Fromkin, V. 1973. The nonanomalous nature of anomalous utterances. In V. Fromkin, *Speech errors as linguistic evidence*. Mouton, Paris.

Hauser, M., Chomsky, N., & Fitch, T. 2002. The Faculty of Language: What is it?, Who has it? And how did it evolve? *Science* 298, 1569-1579.

Stromswold, K. 2000. The cognitive neuroscience of language acquisition. M. Gazzaniga (ed.),

The new cognitive neurosciences, second edition, 909-932. Cambridge, MA: MIT Press.

Stromswold, K. 2010. Genetics and the evolution of language: What genetic studies reveal about the evolution of language, pp. 176-190. In RV Larson, V. Deprez, and H. Yamakido (eds.), *The Evolution of Human Language : Biolinguistic Perspectives*. Cambridge University Press.

Additional required and recommended readings may be assigned throughout the semester.

TENTATIVE LECTURE SCHEDULE

Unit 1: Language, Communication & Thought		
Thur 9/3	Introduction to Psycholinguistics	Fernandez & Cairns, pp 25 – 29. Optional: Pinker, chap. 1 – 2
TUES 9/8	Language & Communication	Traxler chap. 1, pp 1 – 18, Crystal, pp. 396 – 398
Thur 9/10	Language & Communication	Hauser, Chomsky & Fitch
Mon 9/14	NO CLASS (Rosh Hashanah)	
Thur 9/17	Language & Thought	Traxler chap. 1, pp 18 – 30 , Pinker, chap. 3
Mon 9/21	Language & Thought	Traxler chap. 1, pp 18 – 30 , Pinker, chap. 3
Unit 2: Sounds: Phonetics, Speech Production & Speech Perception		
Thur 9/24	Phonetics & Phonology	Fernandez & Cairns, pp 29 – 44 Optional: Pinker, chap. 6
Mon 9/28	Speech Production	Traxler, chap. 2, pp 51 – 54 (skim 37 – 43)
Thur 10/1	Speech Perception	Language File 9.4
Mon 10/5	Speech Perception	Traxler, chap. 2, pp 54 – 72
Thur 10/8	Speech Perception	Traxler, chap. 9, pp 325 - 344
Unit 3: Word Processing		
Mon 10/12	Words & meaning	Traxler, chap. 3, pp 79 – 97; chap 9, pp 344 - 350
Thur 10/15	Lexical Access	Traxler, chap. 2, pp 37 – 51
Mon 10/19	Lexical Access	Traxler, chap. 3, pp 97 – 119
Thur 10/22	Lexical Access	Traxler, chap. 3, pp 97 – 119
Unit 4: Sentences: Syntax, Parsing & Production		
Mon 10/26	MIDTERM (in regular classroom)	
Thur 10/29	Sentences & Syntax	Pinker chap. 4
Mon 11/2	Sentences & Syntax	Fernandez & Cairns, pp 47 – 62
Thur 11/5	Sentence Processing	Traxler, chap. 4, pp 141 – 183; Pinker chap. 7 – 8
Mon 11/9	Sentence Processing	Traxler, chap. 4, pp 141 – 183; Pinker chap. 7 – 8
Thur 11/12	Sentence Production	Re-read Traxler chap. 2, pp. 37-45; Fromkin 1973
Unit 5: Biological Bases of Language		
Mon 11/16	Language Acquisition	Pinker chap. 9, Stromswold 2000
Thur 11/19	Language Acquisition	Traxler chap. 9, p 351-360
Mon 11/23	Neurolinguistics	Traxler chap. 13, (Optional: Pinker, chap. 10)
Thur 11/26	No Class (Thanksgiving)	
Mon 11/30	Neurolinguistics	Traxler chapter 14
Thur 12/3	Neurolinguistics	Traxler chapter 14
Mon 12/7	Genetics & Evolution of Language	Stromswold, 2010, Pinker, chap. 11
Thur 12/10	Sign Language: Wrap up & review.	Traxler chapter 12
Wed 12/16, 12 – 3 pm	Cumulative Final Exam	In regular classroom

GRADING

Final grades will be determined by the total number of points earned in the class. Grades will be scaled so that the top-scoring student receives 100 points for the course. For example, if the top scoring student earns 95 points during the course, all students will have an additional 5 points added to their final grade. Course grades will be assigned as follows:

A (90-100 points); B+ (85-89 points); B (80-84 points); C+ (75-79 points); C (70-74 points); D (60-69 points); F (<60)

Attendance: Worth 5-10% of grade

Weekly online quizzes: Worth ~ 25% of grade (2 points per quiz)

Midterm exam: Worth between 25 – 30% of grade

Final exam: Worth between 40 – 45% of grade. Approximately one third of the questions on the final will cover material from the first 1/2 of the course and two-thirds of the questions will cover material from the second half of the course.

Extra credit: Students may earn up to 5 extra credit points

- 1 point for doing the “dry run/practice” online sakai quiz (see below)
- 1 point for each 2 page extra credit paper (maximum number: 4). See “Extra Credit” below for more info.

A note from a doctor, dean or other appropriate person will be required for makeup quizzes and exams and late extra credit assignments.

Students with accommodations for disabilities: If you are given classroom or exam accommodations (e.g., note-takers, extra time on exams), talk to me during the first 2 weeks of the course. In order to receive exam accommodations, you must provide me written documentation regarding the accommodations no later than 7 days before an exam. At this point, we will make specific arrangements about when and where you will take the exam.

WEEKLY ONLINE QUIZZES

Content. There will be 12 - 13 online quizzes

- Non-cumulative: covers material in that week’s lectures and reading assignments
- Test basic understanding of material you need to know to understand subsequent material

Format:

- Between 5 – 10 questions (multiple choice, true/false, matching etc.)
- Untimed (but only available for a 24 hours)
- Open book & notes
- **All work must be done independently!**
 - No copying, photographing or recording the questions
 - No collaborations or consultations with anyone else
 - No posting or discussing questions/answers with anyone else
 - **Anyone caught GIVING or RECEIVING help on a quiz will get a zero for ALL quiz grades**

Mechanics

- Quizzes will be online on Sakai’s tests/quizzes section

- Quizzes will generally be “live” on Sunday from 12 am to 11:55 pm (for exceptions, see Quiz schedule below)
- Quizzes must be taken during the period that the quiz is “live.”
- Location: You may take the quizzes wherever you want. Just make sure you have a GOOD internet connection and are able to see images and hear files.
- Number of quizzes: 12 (plus an extra credit “trial run” quiz. See below).

Benefits:

- Can monitor progress/understanding of material
- The material in this course builds on itself, just like in a math class, so it is important to keep up
 - Weekly quizzes reduce the temptation to procrastinate until right before the midterm or final
- Spaced learning is more effective than cramming

“Dry Run” Extra Credit quiz

- Time: Friday 9/4 @ 12:00 am – Fri 9/11 @ 11:55 pm
- Value: worth 1 extra credit point
- Material covered: mechanics of the course & quizzes (e.g., exam dates, listening to files, viewing pictures)
- Goals
 - Successfully access the system, take the quiz & save the results
 - Learn what the interface is like
 - Learn if you have technical problems (software/hardware incompatibility, internet issues, etc.)

TENTATIVE SCHEDULE OF QUIZZES

Dates	TENTATIVE Topic
Friday 9/4 – Friday 9/11	Extra Credit: Dry run quiz
Sunday September 13	Language & Communication
Sunday September 20	Language & Thought
Sunday September 27	Phonetics & Phonology
Sunday October 4	Speech Production & Perception
Sunday October 11	Speech Perception
Sunday October 18	Words & Lexical Access
Sunday October 25	NO QUIZ (Midterm on 10/26)
Sunday November 1	Sentences & Syntax
Sunday November 8	Sentence Processing
Sunday November 15	Sentence Processing & Production
Sunday November 22	Language Acquisition
Tuesday 11/24 12 am – Sun 11/29 11:59 pm (week of Thanksgiving break)	Biological Bases of Language

Sunday December 6th

Genetics & Evolution of Language

EXTRA CREDIT PAPERS

PURPOSE: Students may earn up to 4 extra credit points toward their final grade by writing two page papers on colloquia (talks), journal articles, or experiments that have to do with language. (See “THREE WAYS OF EARNING EXTRA CREDIT” below). The purpose of the extra credit assignments is to give students the experience of learning about language in the ways that a researcher/scientist learns about language.

HOW MANY: maximum of 4 papers, each of which is worth 1 point.

CONTENT OF EXTRA CREDIT PAPERS: You will receive one point toward your final grade for each two-page (double spaced) paper you write about an acceptable language colloquium, language experiment, or language development journal article. (See below for an explanation about what counts as “acceptable.”). The content of extra credit papers is very flexible. Some possibilities are 1) a summary of the talk or paper, 2) what you liked/disliked about the talk or paper, 3) how you would change the talk or paper, 4) what you did and did not understand about the talk or paper, 5) how the material covered in the talk relates to what you have learned in class. The key is that your extra credit paper be written in your own words and contain your own thoughts. I do not expect a professional-quality paper, but plagiarism will not be tolerated! (See below for a description of plagiarism.)

TENTATIVE deadlines for extra credit assignments

Papers are due no later than 11:55 PM on:

EC #1: Friday October 9th

EC #2: Friday October 30th

EC #3: Friday Nov 20th

EC #4: Friday Dec 5^h

(You may hand in extra credit papers early, but late papers will not be accepted.)

HANDING IN EXTRA CREDIT PAPERS. Submit papers via the course Sakai site’s Assignment 2 function.

On the top of your paper, give your name, RUID and email address. Depending on the type of extra credit paper, on the top of the paper, give the following info

- **Experiment:** date you did the experiment, and experimenter’s name and phone or email)
- **Talk:** The date, speaker, & title of the talk.
- **Paper:** Full citation for the article (the authors of the paper, year of publication, the title of the paper, name of the journal, journal volume, page numbers).

THREE WAYS OF EARNING EXTRA CREDIT POINTS:

1) COLLOQUIUM TALKS. Attend a colloquium that concerns language and write a 2-page double-spaced paper that summarizes the talk and what you have learned by attending the talk. Throughout the course, I will announce various colloquia/talks that count towards extra credit. Here a the list of talks that I currently know about:

Tues Sept 8, 1 pm	Dr. Ayesha Kidwai (<i>Jawaharlal Nehru University, School of Language, Literature and Culture Studies, Centre for Linguistics</i>). Topic TBA
----------------------	---

2) LANGUAGE EXPERIMENTS. Participate in a language experiment and write a 2-page double-spaced paper that summarizes what you did in the experiment and what you think the experiment was investigating. If you are interested in doing an extra credit paper based on participating in a language experiment, the following researchers may have suitable experiments for which they need adult subjects.

Language Acquisition & Processing Lab

Gwen Rehrig (glj16@scarletmail.rutgers.edu)

Aldo Mayro (ajmayroj@gmail.com)

Katie Aveni (katieaveni@gmail.com)

Linguistics: <http://rutgerslinguistics.sona-systems.com/Default.aspx?ReturnUrl=%2f>

Caveats about writing papers on language experiments:

- You may not be eligible to participate in some experiments (e.g., because of your language background)
- The researchers may not need participants
- It is possible (though very unlikely) that experiments conducted by the above researchers are not language-y enough. If in doubt, ask me before you do the experiment!

There may be other Rutgers researchers conducting language experiments on adults. Check with me before you do an experiment with someone not on this list so I can determine whether the experiment counts. When you speak with me, you will have to provide a printout that gives the name of the experiment, the experimenter or lab that is conducting the experiment, and the affiliation of the experimenter (e.g., Rutgers Psychology Department). When you hand in your paper, please append this print out.

3) JOURNAL ARTICLES. Read a peer-reviewed, published journal article on psycholinguistics and write a 2-page paper about what you learned by reading the paper. In order to get credit, your paper must give the full citation for the article (the authors of the paper, year of publication, the title of the paper, name of the journal, journal volume, page numbers), and you must include as a separate attachment the abstract for the article.

Articles must have been published in the last 5 years (i.e., 2010-) and must appear in the following journals

Applied Psycholinguistics

Brain & Language

Journal of Child Language

Journal of Psycholinguistic Research

Journal of Neurolinguistics

Language and Cognition

Language and Cognitive Processes

Memory & Language,

[If you really want to read an article that appears in some other journal, please speak to me before you read the journal paper so I can determine whether the journal article will count for extra credit. When you speak to me, you must bring a print out that has the name of the journal, the authors of the paper, the title of the paper, and the abstract. When you hand in your paper, please append a copy of the journal article. Book chapters, articles that appear in the popular press (e.g., New York Times, Scientific American, Time Magazine, etc.), and on-line articles (e.g., Wikipedia entries, NIH summaries, articles directed at parents, etc.) do not count.

How to find journal articles

1. Go to the following URL:
<http://www.libraries.rutgers.edu/rul/indexes/findarticles.shtml>
2. [You can get an overview on how to find an article at RU, by going to the following URL]
http://www.libraries.rutgers.edu/rul/how_do_i/find_an_article.shtml

3. Go to the link that says "Indexes and Databases"
<http://www.libraries.rutgers.edu/rul/indexes/indexes.shtml>
This lists all of the indexes and databases that RU subscribes to in alphabetic order and by subject.
4. For most of you, the most relevant databases will be:
PsycInfo:
http://www.libraries.rutgers.edu/rul/indexes/search_guides/psycinfo.shtml
Medline: http://www.libraries.rutgers.edu/rul/indexes/search_guides/medline.shtml
It is also not a bad idea to check the "by subject" to see if there are any additional or more specialized databases you should search.
5. Once you choose your database, login in by hitting the CONNECT button. You will be prompted to provide keywords or phrases.
6. The default search is a Keyword search. If "Map terms onto subject headings is "clicked", your terms will be used to find matching subject headings, a strategy that sometimes is useful when you are just beginning
7. If you want to search for a particular author, click the author icon, and then provide the last name of the author and the author's first initial.
8. If you "unclick" "map term to subject heading", the system will yield matches where that word appears in the journal title, author, journal title or abstract.
9. If you get too many hits, you can use the "LIMIT" function to limit your search to particular years, articles with abstracts, review articles, age groups, population groups (e.g., animals vs. humans), publication type etc. For example, if you merely search for "autism" on PsycInfo, you will get 16155 hits ... far too many to even read the abstracts of. But let's say I am interested in animal models of autism, and only want articles written in English, with an abstract. By limiting my search to English, abstract and animal, I get a semi-manageable 205 hits.
10. Another strategy for when you get too many hits is to use the COMBINE function to combine the results of two or more searches. For example, on PsychInfo, combining the searches for "autism" with "genetics" yields a hefty 679 hits. Combining "autism", "genetics" and "twin" will pick out the articles that have all 3 words, in this case a manageable 41 hits.
11. Once you have found a reference for something that appears in a journal, see if Rutgers has an electronic version of the journal by going to the following URL:
http://www.libraries.rutgers.edu/rul/rr_gateway/ejournals/ejournals.shtml
Most of the time you will be interested in electronic journals, not electronic government journals.
12. Even if the RU Library does not have the electronic version of the journal, they may have a hard copy version of the journal. You can check this by going to:
http://www.libraries.rutgers.edu/rul/how_do_i/subscribes.shtml

A good summary of databases available to Rutgers students can be found at the following URL and its links:
http://wire.rutgers.edu/research_finding_library.html

PLAGIARISM

DO NOT PLAGIARIZE. If you are caught plagiarizing any extra credit assignments, you will not receive for any of their extra credit assignments. Furthermore, depending on the egregiousness of the plagiarism, I reserve the right to lower your final grade and/or notify your dean about the plagiarism.

WHAT IS PLAGIARISM?

1. If you copy something that is in print ANYWHERE (books, journals, popular magazines, on-line. blogs, mailing lists etc.), you are plagiarizing.
2. Taking someone else's words and substituting a word here or there is still plagiarism.
3. Paraphrasing someone else's words but 'borrowing' their line of argument and reasoning is plagiarism.

4. Plagiarism is stealing. Better to hand in something that is yours but not polished, than to hand in something that is perfect but stolen.
5. For more guidelines on plagiarism, see http://wire.rutgers.edu/research_plagiarism.html

WARNING ABOUT USING COMMERCIAL SITES (e.g., StudyBlue etc.)

1. All of the materials on this course's sakai site are copyrighted (e.g., syllabus, lecture notes, lecture slides, study guides, tests, readings, etc.)
 - o They are exclusively for students enrolled in the course
 - o You may download sakai resources and edit them as you wish for the purposes of preparing for this course.
 - o You may not give or sell the material to anyone who is not enrolled in the course
 - o Specifically, you may not publish or post any of the material on another non-commercial or commercial site (e.g., StudyBlue etc.). Doing so is illegal.
1. What appears on StudyBlue is often inaccurate, out-of-date etc.

LECTURE SLIDES

WARNING: The posted lecture slides are only meant to aid you in taking notes during class. They are not substitutes for attending class.

At the beginning of a topic, I will post the lecture slides for that topic. I recommend you look over the slides before lecture and bring a copy of them to class to take notes on. Three caveats about the slides

1. The lecture slides are only meant to aid you in taking notes during class, and to remind you of what was covered in class. They are not substitutes for attending class.
- 2) Because I post the slides BEFORE the lectures, they are subject to change. I recommend that you check the sakai site periodically to make sure you have the most up-to-date version.
- 3) Despite my best efforts, sometimes the slides will contain typos. If you think you have found a typo, send email to psychlang@gmail.com

UNGRADED EXERCISES

Periodically, I may give you exercises to do at home. These exercises are designed to help you learn the material and/or extend your knowledge. You will not be asked to do hand them in and they do not count towards your grade. Answers will not be posted. Rather, if you have trouble with an exercise, you should ask me to go over it in class or you can get help during my office hours or the TA's office hour.

In general, you should do exercises after the corresponding lecture. For example, you should do the Language & Communication exercise after the Language & Communication lecture. Sometimes, we will go over the exercises in the beginning of the next class. Sometimes we will do so because a number of students had trouble completing the exercise, and sometimes we will do so because the exercise involves students generating their own examples of phenomena.

Some hints for doing well in this class:

1. **Come to every class and take good notes.** If you do miss a class, get the notes from a classmate. I stress

different topics in my lectures than those stressed in the readings. The material I stress in lecture tends to appear on exams.

2. Spend 10 minutes immediately after each lecture going over your lecture notes, reconstructing the lecture and making sure you understand the "key concepts" for the day.
3. Spend the 10 minutes before each lecture going over the lecture notes and "key concepts" from the previous class.
4. Try to at least skim the assigned readings before each class.
5. When you go back and reread the books, use the lecture notes to guide your reading.
6. If you are having trouble with one of the readings for a topic, try the other reading for the topic.
7. If you don't understand something said in the lectures or in the readings, let me know. Ask a question in class or come to my office hours. Chances are if you are confused, others are too.
8. Use the posted slides, your lecture notes and the "key concepts" to review for exams
9. Come to my office hours!
10. Use the chat room! Chances are if you have a question, someone can answer it.
11. Form a study group and quiz each other on key concepts. Study groups can be physical or virtual.
12. Create a group study document
13. The quizzes are designed to assess whether you have learned the material in a unit. Even though the quizzes are open book and untimed, you will get more out of them if you have done the readings and reviewed your notes and the slides BEFORE you take a quiz.
14. **Do not try to cram.** The material in this course builds on itself, just like in a math or physics course and the exams are cumulative. If you don't learn the material in the beginning of the course, you are going to be lost.

KANZI THE BONOBO. [Launch interactive](#)

What would it be like to converse with a bonobo? According to primatologist Sue Savage-Rumbaugh, a lead scientist at the Great Ape Trust of Iowa, these apes cannot only understand language, but some of them can convey their thoughts and feelings to humans and to each other by pointing to any of hundreds of symbols on lexigram keyboards. In this audio slide show, meet Kanzi, the Trust's alpha male, who has demonstrated an extraordinary ability to communicate on our terms.
